TECHNOLOGY SERVICES - QA

Performance Testing and Engineering

Our performance Engineering services encompass the length & breadth of a system's performance engineering requirements such as Responsiveness, Scalability, Reliability & High Availability. In its journey to provide highly specialized services, the Performance Engineering Practice and its highly skilled & trained consultants are committed to deliver the right quality, the first time. We take a differentiated approach of engineering IT for performance than just testing to ensure the right quality, as a one-stop shop.

Functional Testing

Our QA Testing Team is a cross-trained and exposed to various verticals that we support, be it Energy, Retail, Education, Government and Publication. Our focus has always been to improve the quality of the product while ensuring a cost-effective test cycle. Our domain knowledge, recommending and using automation and frameworks at the right time and well defined QA methodology yield a YoY engagement cost reduction of 10-20%. Our robust infrastructure and disaster-recovery plan enable us to provide continuous testing services (24X7) and encapsulate daily backups.

TECHNOLOGY SERVICES - QA
